

PANEL HANDLING WARNING!!!

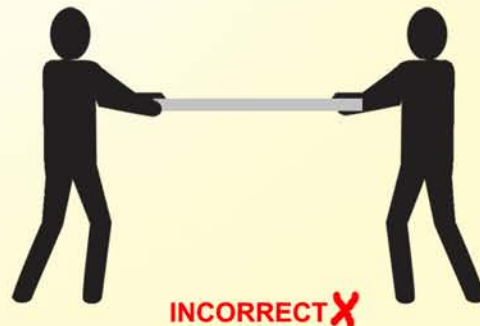

CORRECT ✓
Lift panels up by long side first. Carry them vertically (up and down) also by long edge with one hand under bottom edge to support weight.

Please handle all panels the correct way, especially if you are using one inch thick panels. Lift panels from the long side first, and then stand them up to carry them the correct way. **HANDLING INCORRECTLY WILL VOID THE WARRANTY ON EACH PANEL.**

Do not lift or carry panels by short side vertically as this could damage panels.

Do not lift or carry panels horizontally as this could damage panels - especially 1" thick panels.
